Guardians of Time

In the frozen valleys of the Swiss Jura, a dying breed of master artisans refuses to let the digital age erase centuries of mechanical perfection.

NZZ

"A smartwatch tells you
what the time is. A
mechanical watch tells
you what time means."

JEAN-CLAUDE, MASTER HOROLOGIST

NZZ

The Vallée de Joux has been the beating heart of Swiss watchmaking since the 18th century.

Here, beneath the heavy winter snows, artisans work in absolute silence, manipulating gears and springs so small they are barely visible.

NZZ

The Philosophy of Craft

The Machine

Mass production favors absolute uniformity. Stamped metals, quartz batteries, and silicon chips designed for obsolescence within five years.

The Hand

True horology embraces slight human imperfections. A hand-polished tourbillon carries the soul of its maker, designed to outlive them by generations.

NZZ

150
HOURS MINIMUM

It takes an average of 150 hours to assemble a standard grand complication watch. Some masterpieces require over a year of dedicated focus by a single artisan.

NZZ

An Uncertain Future

As the global luxury market shifts and smart technology becomes ubiquitous, these remote workshops face an existential question.

Is there still a place in the modern world for objects whose only function is perfection?
